

# **Southeast Missouri Healthcare Coalition Planning Workshop**

February 20, 2019

# **Welcome and Introductions**

# Today's Objectives

- Reinforce the role of the HCC following a NMSZ incident impacting southeast Missouri.
- Collectively identify 5-7 essential elements of information requested of health care organizations following a catastrophic incident.
- Collective identify 5-7 EEIs requested by health care organizations following a catastrophic incident.

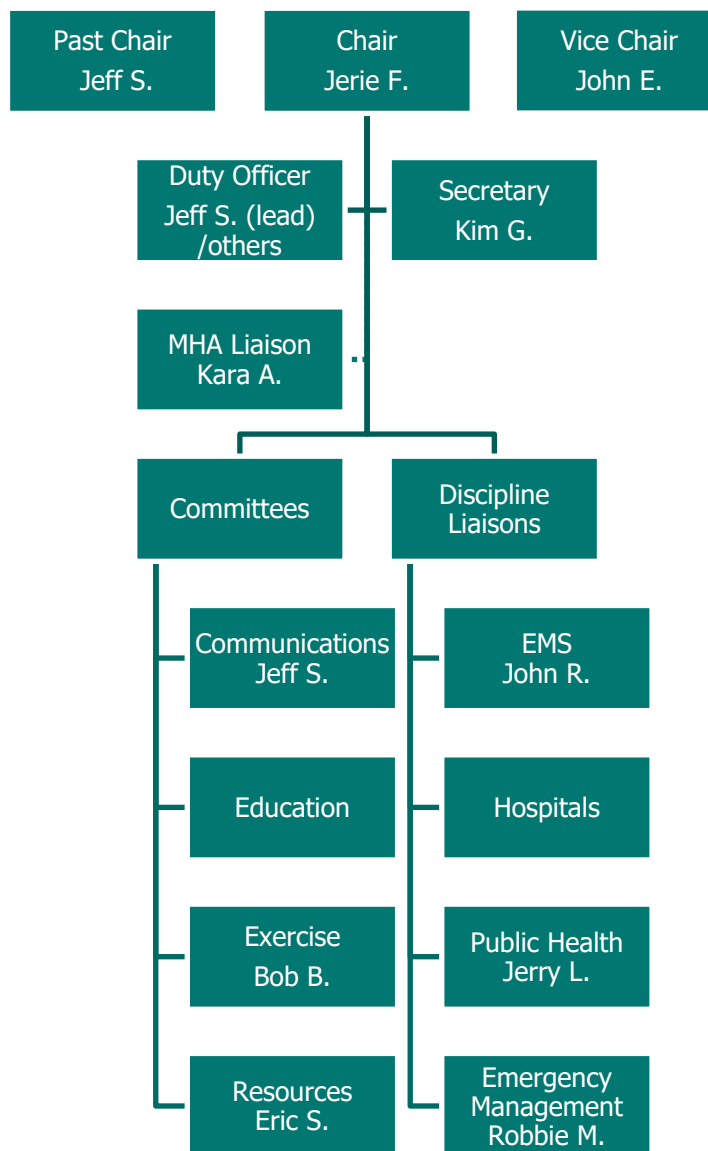

# Background and Awareness

- HCCs – communication and coordination
- Available Communication Platforms
  - Internet (Juvare's EMResource and eICS)
  - Radio (MOSWIN)
  - Deployable Assets (Communication Trailers)

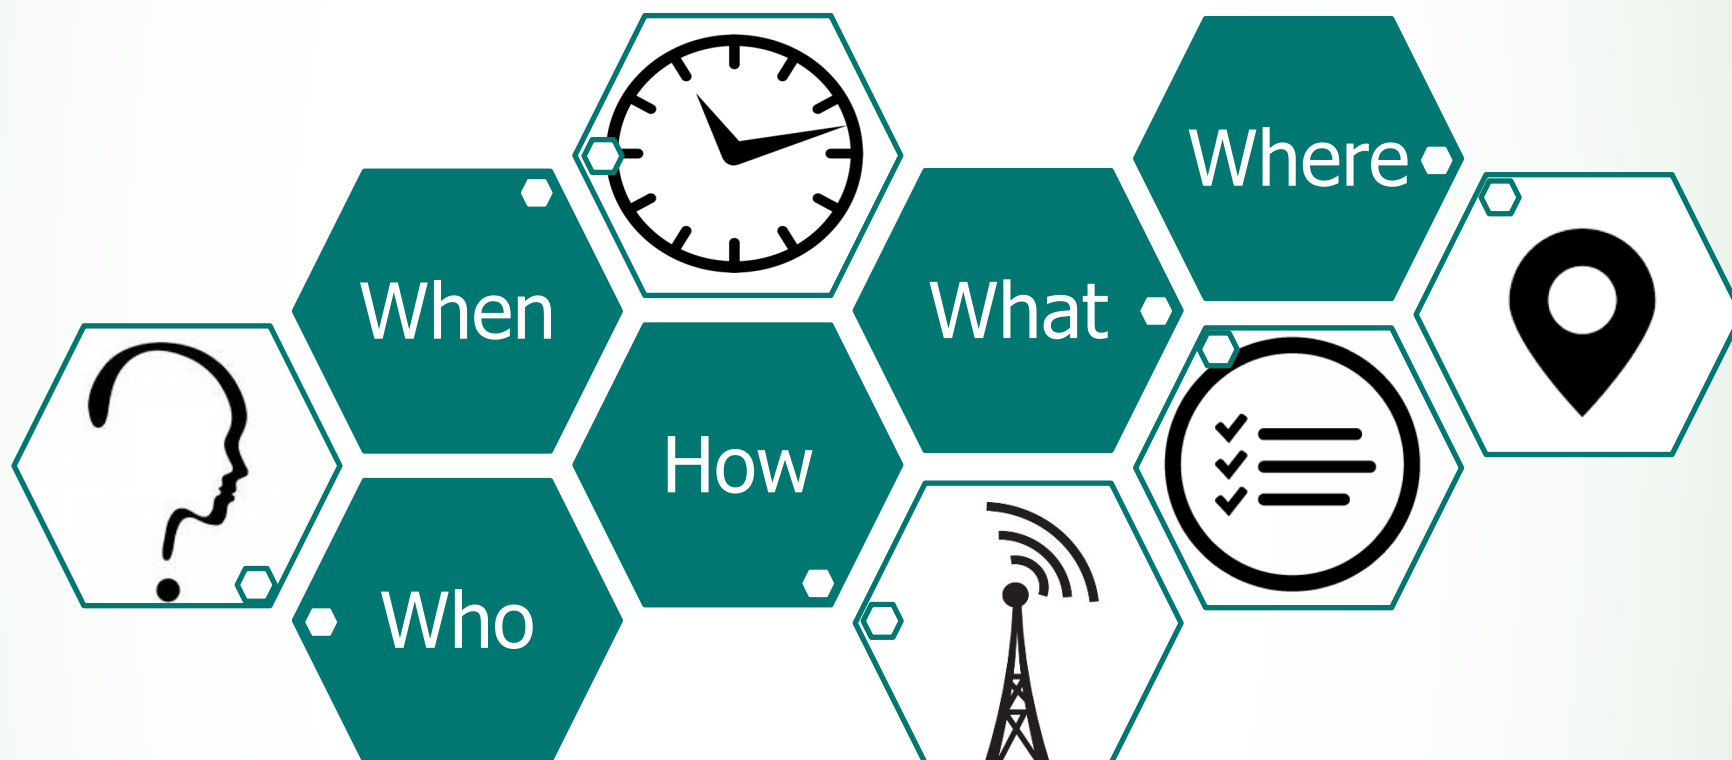

# SE HCC Leadership Chart

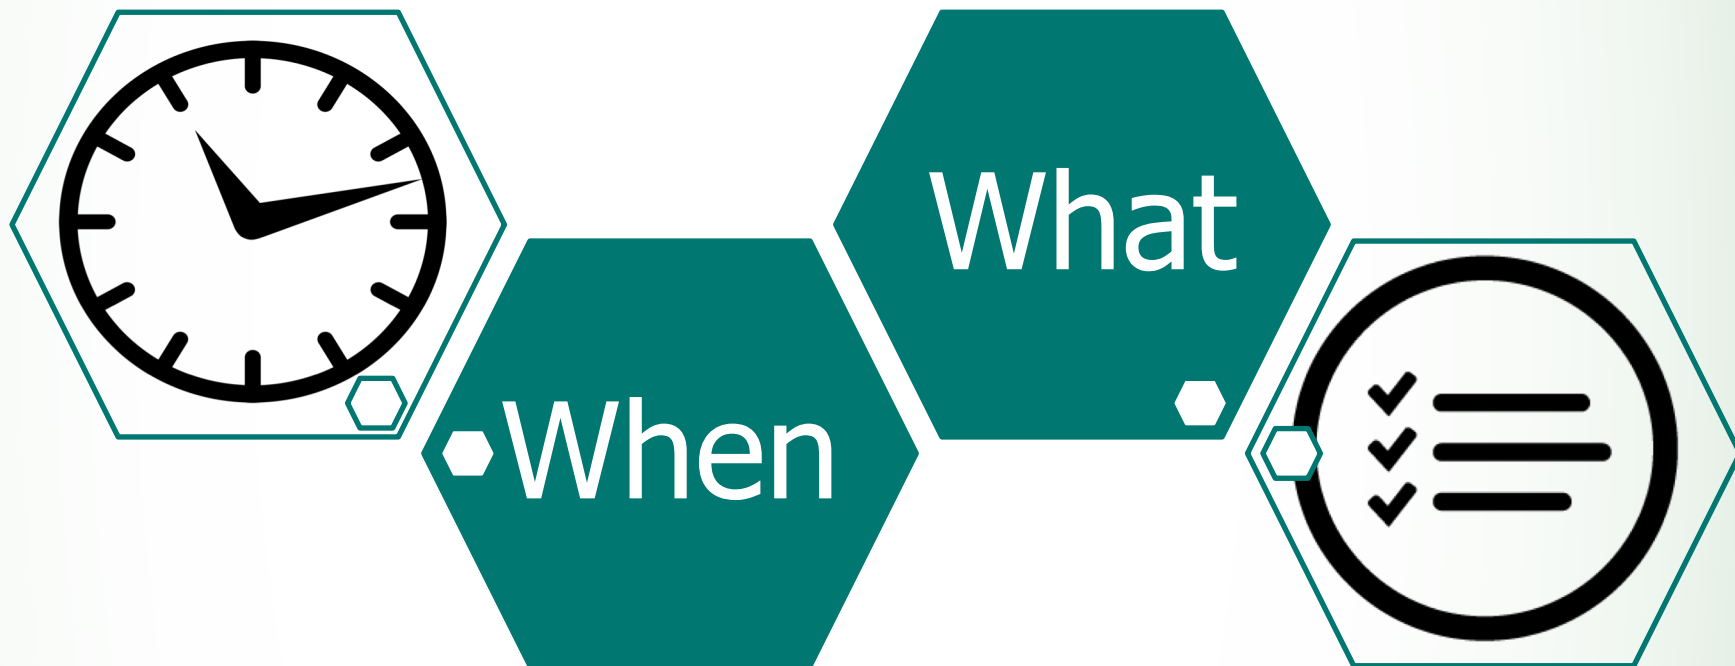

# **Identifying Essential Elements of Information**

# Information Requested BY the HCC

# EEIs 4 hours post incident

# EEIs 12 hours post incident

# EEIs 24 hours post incident

# **Information Requested FROM the HCC**

# EEIs 4 hours post incident

# EEIs 12 hours post incident

# EEIs 24 hours post incident

# Where do we go from here?

- Identify those not present today that need to engage or review.
- HCC leadership to consolidate information gathered this afternoon and make it available for final review and approval during second quarter healthcare coalition meeting on May 9.
- Healthcare organization review their internal response plans based on final version and update accordingly.

# HCC Reminders

- eiCS notification drill: 1:00 p.m., March 13
- Next face to face meeting: 10 a.m., May 9, 2019, Missouri Delta Medical Center, Sikeston
- Ebola Full Scale Exercise: Wednesday, May 29, 2019
- NMSZ Communication Trailer Exercise: June 3-7, 2019
- Spring 2019 surge exercise: TBD

## What's Trending

[Seminars & Webinars](#)

### 2019 Missouri Legislative Guide

The 2019 [legislative guide](#) summarizes MHA's positions on anticipated state legislative issues. The guide can be used to support and inform hospital-based advocacy efforts at the state level.

### Member Update on Medicaid DSH Audits

MHA updates members on Medicaid DSH Audits. A recording and slides are [available](#).

### Reimagine Rural Health™

Missouri hospitals stand ready to collaborate with state government and others to find ways to improve the health care delivery system for rural communities. [Explore](#) 10 rural health issues and policy options to address them.

# Emergency Preparedness

MHA's emergency preparedness and response resources are designed to assist health care facilities — a collaboration among government, public health, long-term care, clinics and hospitals — in planning for, and reacting to, all hazards. Health care planning

establishes hospital and community readiness before an emergency, and a proven response and recovery framework during and after an emergency. Health care readiness also increases overall community resiliency.

MHA's staff and resources are available to support hospitals with information and tangible resources in the event of an emergency. MHA is committed to providing leadership, expertise and guidance to support health care preparedness and response.

## EMResource®/eICS

Intermedix released [eICS Version 3.6](#) into production on July 5. A [recording](#) of the Intermedix Showcase highlights added features of the release.

Through ASPR Hospital Preparedness grant funding, MHA maintains Missouri's license for the Juvare eICS application and is able to offer access to hospitals and health care coalitions throughout Missouri. If your facility currently uses the Juvare eICS software for incident notification and response, I recommend that you watch the video for the latest information on updates to the system. The video is approximately 26 minutes long, and walks through how to customize incident objectives, create objective templates, and use new group messaging features. It also demonstrates a new objectives reporting capability and updates to various map icons.

EMResource and eICS are web-based applications within the Juvare suite of health care communication and response coordination software. Missouri hospitals and health care organizations utilize these applications for organizational and regional response coordination. The Missouri Hospital Association maintains the statewide license for these applications through funding from the ASPR Hospital Preparedness Program, CFDA
