The SEMA Watch Center is activated at a Level 3 until further notice.

SEMA will be monitoring COVID-19.
STATE WATCHES, WARNINGS, & ADVISORIES

Current Watches, Warnings, and Advisories

Flood Warning

Graphic Created
March 26th, 2020
7:14 AM CDT
### Hazardous Weather Outlook (Today)

- For this morning, patchy dense fog will be present across portions of south central Missouri, and dissipate after sunrise.
- Thunderstorms will move into portions of the Missouri Ozarks tonight into Friday morning. There will be a risk for large hail and damaging wind gusts with some of the most intense thunderstorms. The greatest risk is across southeast Kansas into central Missouri. There is additional concern for localized heavy rainfall in the thunderstorms.
- Severe storms are possible tonight mainly along and south of Highway 50.
- There is a chance for thunderstorms late tonight for portions of eastern and central Missouri. A few strong to severe storms are possible, mainly along and south of I-70 with the main threat being large hail, though damaging winds are also possible.

### Days Two Through Seven

- There is a risk for scattered severe thunderstorms on Friday evening into the late Friday night for portions of the Missouri Ozarks. There is risk for large hail, damaging wind gusts, and an isolated tornado. The greatest risk is across portions of southwest Missouri. Non thunderstorm wind gusts of 30 to 40 mph will be possible late Friday night through Saturday evening with strong low pressure moving from the central Plains to the Midwest.
- Another round of severe storms is possible Friday evening in portions of west central Missouri.
- The chance for thunderstorms will continue Friday morning for eastern and central Missouri, then more thunderstorms are likely for much of the area Friday afternoon through Saturday. A few strong to severe storms are possible early Friday and again Friday afternoon through Friday evening, with large hail and damaging winds the main threats. Another round of strong to severe storms will be possible on Saturday.

### Current Watches, Warnings & Advisories in Effect:

- Flood warning for multiple counties in Missouri.

---

3/26/2020
People at risk for serious illness following infection with SARS-CoV-2:

- Based on current information, those most at risk include:
  1) people 65 years and older; 2) people who live in a nursing home or long-term care facility; 3) people of any age with heart disease, diabetes, or lung disease, particularly if the disease is not well controlled.

- Eight out of 10 deaths in the U.S. have been in adults ≥ 65.

- However, severe illness leading to hospitalization, including ICU admission and death, can occur in adults of any age with COVID-19.

On March 16, the White House announced a program entitled “15 Days to Slow the Spread,” a nationwide effort to slow the spread of COVID-19 through the implementation of social distancing at all levels of society. It calls for avoidance of social gatherings in groups of more than 10 people, and for older persons and those with underlying health conditions to stay home and away from other people. The program is recommended for 15 days; however, CDC indicates that the status of the outbreak will continually be reassessed, and that “it may be that these measures will need to be modified or extended for additional periods of time.” See https://www.whitehouse.gov/wp-content/uploads/2020/03/03.16.20_coronavirus-guidance_8.5x11_315PM.pdf, and also https://www.cdc.gov/coronavirus/2019-ncov/community/15-day-pause.html.
15 DAYS TO SLOW THE SPREAD

Listen to and follow the directions of your STATE AND LOCAL AUTHORITIES.

IF YOU FEEL SICK, stay home. Do not go to work. Contact your medical provider.

IF YOUR CHILDREN ARE SICK, keep them at home. Do not send them to school. Contact your medical provider.

IF SOMEONE IN YOUR HOUSEHOLD HAS TESTED POSITIVE for the coronavirus, keep the entire household at home. Do not go to work. Do not go to school. Contact your medical provider.

IF YOU ARE AN OLDER PERSON, stay home and away from other people.

IF YOU ARE A PERSON WITH A SERIOUS UNDERLYING HEALTH CONDITION that can put you at increased risk (for example, a condition that impairs your lung or heart function or weakens your immune system), stay home and away from other people.
DO YOUR PART TO SLOW THE SPREAD OF THE CORONAVIRUS

Even if you are young, or otherwise healthy, you are at risk and your activities can increase the risk for others. It is critical that you do your part to slow the spread of the coronavirus.

Work or engage in schooling **FROM HOME** whenever possible.

**IF YOU WORK IN A CRITICAL INFRASTRUCTURE INDUSTRY,** as defined by the Department of Homeland Security, such as healthcare services and pharmaceutical and food supply, you have a special responsibility to maintain your normal work schedule. You and your employers should follow CDC guidance to protect your health at work.

**AVOID SOCIAL GATHERINGS** in groups of more than 10 people.

Avoid eating or drinking at bars, restaurants, and food courts — **USE DRIVE-THRU, PICKUP, OR DELIVERY OPTIONS.**

**AVOID DISCRETIONARY TRAVEL,** shopping trips, and social visits.

**DO NOT VISIT** nursing homes or retirement or long-term care facilities unless to provide critical assistance.

**PRACTICE GOOD HYGIENE:**

- Wash your hands, especially after touching any frequently used item or surface.
- Avoid touching your face.
- Sneeze or cough into a tissue, or the inside of your elbow.
- Disinfect frequently used items and surfaces as much as possible.
SEVERE WEATHER OUTLOOK – DAY 1

Categorical Outlook

Wind Outlook

Tornado Outlook

Hail Outlook

3/26/2020
Strong to Severe Thunderstorms Possible Tonight into Friday Morning

Large hail the primary hazard

When: Tonight PM into early Friday AM
Where: Southeast Kansas, southwest Missouri and central Missouri
Hazards: Large hail up to the size of golf balls, an isolated damaging wind gust up to 60 mph, and frequent lightning. Localized heavy rainfall also possible.
Actions: Be weather aware and ready to act! Have a way to receive warnings!

Severe Storms Possible Tonight
Mainly Along & South of Hwy 50

When: Overnight, mainly after midnight to early Friday morning
Hail: Isolated to scattered large hail
Damaging Wind: Isolated strong winds are possible
Tornadoes: None expected

A cold front will move through the area and stall south of the Kansas City area. As warm air and moisture overrun that stalled front, strong to severe thunderstorms are expected to develop, mainly after midnight and persist through Friday morning. The strongest storms could produce large hail. While damaging winds are not expected there could be some strong winds. Tornadoes are not expected with this round of potential severe weather.
We'll see multiple chances for severe storms through Saturday. The best chances for severe will be late tonight, Friday afternoon and evening, and again on Saturday.
Rain chances look to increase over the next 24 hours and continue into the weekend. Cool weather will continue north of Interstate 80, with milder weather south through Friday.

Strong to severe storms are possible across portions of the Mid-South on Saturday.
