The SEMA Watch Center is activated at a Level 4 until further notice.

SEMA will be monitoring COVID-19.
Hazardous Weather Outlook

• Limited thunderstorm wind damage risk.
  Limited flooding risk.
  Limited lightning risk.
  Limited non thunderstorm wind risk.
• Thunderstorms are expected today with the main potential hazard being cloud to ground lightning. A few storms may produce small hail and wind gusts over 40 mph. Locally heavy rainfall will also be possible.
• Scattered thunderstorms are expected across parts of the area both this morning and afternoon, particularly across northeast and central Missouri, as well as west-central Illinois. The threat of severe storms is low, but a few storms may produce occasional damaging wind gusts during the afternoon.
• Strong storms with winds up to 45 mph will be possible with a line of storms this morning. Lightning and brief heavy rain will also be possible with these storms.

Days Two Through Seven

• Scattered thunderstorms will continue through Friday as a front stalls across the region. There is a threat for locally heavy rainfall and isolated flooding.
• Chances for thunderstorms will persist Thursday and Friday, although severe storms are not expected.
• Another round of thunderstorms is expected Thursday night...no
• hazardous weather is expected.

Watches, Warnings & Advisories in Effect:

• There are no active watches, warnings or advisories in Missouri.
Worldwide information can be found at https://covid19.who.int/.

U.S. information can be found through the CDC at https://covid.cdc.gov/covid-data-tracker.

Missouri information can be found through the Missouri Department of Health and Senior Services at https://showmestrong.mo.gov/data/public-health/.
How to Wear Your Mask

**How to Select, Wear, and Clean Your Mask**

CDC recommends that you wear masks in public settings around people who don’t live in your household and when you can’t stay 6 feet away from others. Masks help stop the spread of COVID-19 to others.

- Wear masks with two or more layers to stop the spread of COVID-19
- Wear the mask over your nose and mouth and secure it under your chin
- Masks should be worn by people two years and older
- Masks should NOT be worn by children younger than two, people who have trouble breathing, or people who cannot remove the mask without assistance. Do NOT wear masks intended for healthcare workers, for example, N95 respirators

### DO choose masks that

- Have two or more layers of washable, breathable fabric
- Completely cover your nose and mouth
- Fit snugly against the sides of your face and don’t have gaps

### DO NOT choose masks that

- Are made of fabric that makes it hard to breathe, for example, vinyl
- Have exhalation valves or vents, which allow virus particles to escape
- Are intended for healthcare workers, including N95 respirators or surgical masks

### Special Situations: Children

- If you are able, find a mask that is made for children
- If you can’t find a mask made for children, check to be sure the mask fits snugly over the nose and mouth and under the chin

### Caution: Gaiters & Face Shields

- Evaluation is on-going but effectiveness is unknown at this time
- Evaluation is on-going but effectiveness is unknown at this time

### Do NOT put on children younger than 2 years old
WEATHER STORY

NWS Springfield

Expect non-thunderstorm wind gusts of 30 to 40 mph today.

NWS Kansas City

A line of storms is expected to move through the area this morning. Strong winds up to 45 mph may be possible with these storms as well as brief heavy rain and lightning. Storms are expected to move out of the area by afternoon. Expect mostly cloudy skies and highs in the 70s.

10/13/2021
A warm front will move northeast across Missouri and Illinois this morning, followed up by a cold front late this afternoon. The warm front will produce showers and storms across central and northeast Missouri into west central and parts of southwest Illinois this morning. After a lull in the activity, more thunderstorms are expected to develop this afternoon in central and northeast Missouri, and spread east this evening. A few strong storms are possible today, primarily across parts of central and northeast Missouri into west central Illinois.

We will see readings up near 80 along Interstate 64, to mid 80s toward the AR and TN state lines this afternoon, after scattered showers and storms move northeast across the area.
Showers & Thunderstorms Moving Northeast

Latest Information (5:30 AM CDT)

- Storms are moving into the area from the west. These will continue through the morning.
- Frequent lightning, reduced visibility on the road, heavy rainfall, small hail, and gusty winds can be expected!

A few strong to severe storms are possible on Friday across portions of northeast Arkansas, the Missouri Bootheel, and West Tennessee. Damaging winds and wind gusts will be the primary threats.
