SDE 3.0 Workshop

Presented by: Floodplain Management Section

Your community participates in the National Flood Insurance Program (NFIP).

As the Floodplain Administrator (FPA) one of the most important duties that you have is to do Substantial Damage/Improvement Inspections.

In this Workshop you will learn the basics of Substantial Damage/Improvement Inspections. You will have a chance to inspect a residential structure through images. We will also go over the FEMA SDE 3.0 Tool so it can assist you in your Substantial Damage Determinations.

All NEW Floodplain Administrators and/or the people who are going to assist in these inspections should attend this workshop.

This will be the **ONLY** workshop in your area for the next few years.
